

With bad weather forecasted for the next few days, we at SmartDrive would like to remind you of some winter safe driving tips - we want you to remain as safe and healthy as you are today all winter long!

The Seven Habits of Highly Successful Winter Drivers

1. Watch your Speed and Adjust it for conditions - Remember Braking can take up to 4 times as much time as on dry pavement.
2. Brake or Turn but don't do Both.
3. If you have ABS brakes, apply solid pressure and allow the brakes to do the work. DO NOT PUMP. Only pump non-ABS brakes.
4. If you go into a back end skid, Steer into the skid and don't brake.
5. If you get into a front wheel skid, stay off the brakes and steer gently until you work your way out of it.
6. Pay ATTENTION! Stay Aware of your surroundings and look toward your solution...
7. WEAR YOUR SEATBELT!!!!
